HSIPR Program Application Supporting Forms Track 2 Corridor Program Data

Welcome to the Supporting Forms for Track 2 of the HSIPR Program. This Track 2 Corridor Program Data form is required as part of all Track 2 applications. To begin, save this Excel workbook to your computer and open the file. The buttons below will help you to easily navigate the forms contained in this file. To get started click on the button labeled "1. General Info."

Note 1: Yellow cells should be entered by the applicant and only left blank when not applicable to the program. Blue cells are set up to auto-populate based on formulas that are embedded in the forms. The embedded formulas are supplied for your convenience but you may choose to enter your own values into blue cells in which you do not wish to use the formulas provided.

In the Detailed Capital Cost Budget form, <u>Red cells represent the minimum information</u> required of the applicants; also in that form, <u>White cells are optional</u>. The same is true of two sections of the "Operating and Financial Perf." form dealing with Operating & Maintenance Expenses and the Capital Asset Renewal Charge.

Note 2: For purposes of this application, "Fiscal Year (FY)" refers to the Federal fiscal year (October 1- September 30).

Note 3: All dollar entries should be in thousands of dollars, except where specifically indicated.

Color Key for Completing this Form: Template will FRA Use Only: **Applicant Should Applicant Must Cell Type/Color: Auto-Populate** Applicant Does Input a Value **Input a Value** (see note 1 above) Not Complete General Info (click here first) Capital Cost Info. General Information

Below, please indicate the Corridor Program name, date of submission (mm/dd/yyyy), and an application version number assigned by the applicant. The Corridor Program name must be identical to the name listed in the Corridor Service Overview Master List of Related Applications. Limited to 40 characters, the Corridor Program name must consist of the following elements, each separated by a hyphen: (1) the State abbreviation of the State submitting this application; (2) the route or corridor name that is the subject of the related Corridor Service Overview; and (3) a descriptor that will concisely identify the Corridor Program's focus (e.g., HI-Fast Corridor-Main Stem)

This information will auto-populate other areas of the Supporting Forms.

Corridor Program Name (same as on Application Form)	IA-Chicago to Iowa City-New Service
Lead State or Organization	lowa
Point-of-Contact (POC) Name	Tamara Nicholson
Point-of-Contact (POC) Email	tamara.nicholson@dot.iowa.gov
Point-of-Contact (POC) Phone	515-239-1052
Date of Submission	10/02/09
Version of Submission	1

Application Assumptions

- 1. Please use this section to capture two separate sets of assumptions that will enter the costs shown in subsequent sheets. The contingency rate is the allowance for uncertainties in projected costs. The Annual Inflation Rate will be used to convert between 2010 constant dollars and Year of Expenditure dollars. Enter the assumed annual inflation rate for each category for each year.
- 2. If you wish to use FRA's auto-populated formulas to help complete the capital cost and operating/maintenance information, please enter the requested data into the yellow cells. You may chose to enter your own values into the capital cost budget forms if you do not wish to use the auto-populated formulas. If you use your own values, in the explanation box below note your method as well as describe any supporting documentation submitted with this form.

	Contingency	Annual Inflation Rate Assumptions by Year (%)

^{*} See "Capital Cost Info." for definitions and explanations of the Standard Capital Cost (SCC) Categories.

If not using the FRA-provided formulas, please describe your methodology in the space provided below as well as listing any supporting documentation.

^{**} For 2016 Operating, Financial, and Sustainability Inflation Assumptions, enter a single annual inflation rate for 2016 that will be used for 2016 and all subsequent years.

HSIPR Program Application Supporing Forms Track 2

	FRA Standard Cost Categories for Capital	
	Projects/Programs*	Notes
0 TRACK	STRUCTURES & TRACK	
10.01	Track structure: Viaduct	Include elevated track structure of significant length consisting of multiple spans of generally equal length
10.02	Track structure: Major/Movable bridge	Include all elevated track structures with a movable span, and/or with a span of significant length (generally of approximately 400" or longer)
10.03	Track structure: Undergrade Bridges	Include elevated track structure of greater than 20 feet that does not fall into 10.01 and 10.02
10.04	Track structure: Culverts and drainage structures	Include all minor undergrade passageways (generally of 20 feet or less in width)
10.05	Track structure: Cut and Fill (> 4' height/depth)	Include grading and subgrade stabilization of roadbed
10.06	Track structure: At-grade (grading and subgrade stabilization)	All grading and subgrade stabilization of roadbed not included under cost categories 10.01 through 10.05 and 10.07
10.07	Track structure: Tunnel	Definition self-explanatory
10.08	Track structure: Retaining walls and systems	Definition self-explanatory
10.09	Track new construction: Conventional ballasted	Include all ballasted track construction on prepared subgrade, on new or existing rights-of-way
10.10	Track new construction: Non-ballasted	Include all slab, direct fixation, embedded, and other non-ballasted track construction on prepared subgrade, on new or existing rights-of-way
10.11	Track rehabilitation: Ballast and surfacing	Include undercutting, ballast cleaning, tamping, and surfacing not associated with new track construction
10.12	Track rehabilitation: Ditching and drainage	Definition self-explanatory
10.13	Track rehabilitation: Component replacement (rail, ties, etc)	Definition self-explanatory
10.14	Track: Special track work (switches, turnouts, insulated joints)	Include minor turnouts and interlocking, such as crossovers and turnouts at the ends of passing tracks
10.15	Track: Major interlockings	Significant interlockings at major stations and where routes converge from three or more direction
10.16	Track: Switch heaters (with power and control)	Include cost of power distribution equipment from commercial power source to interlocking location
10.17	Track: Vibration and noise dampening	Definition self-explanatory
	Other linear structures including fencing, sound walls DNS, TERMINALS, INTERMODAL	Definition self-explanatory
		systems such as fire detection and prevention, security surveillance, access control, life safety systems, etc. Include all construction materials and labor regardless of who is performing the work
		systems, etc. menade an construction materials and labor regardless of who is performing the work

HSIPR Program Application Supporing Forms Track 2

	FRA Standard Cost Categories for Capital Projects/Programs*	Notes								
40.07	Purchase or lease of real estate	If the value of right-of-way, land, and existing improvements is to be used as in-kind local match to the Federal funding of the project/program, include the total cost on this line item. In backup documentation, separate cost for land from cost for improvements. Identify whether items are leased, purchased or acquired through payment or for free. Include the costs for permanent surface and subsurface easements, trackage rights, etc.								
40.08	Highway/pedestrian overpass/grade separations	Other than the grade separations included in this line item, highway-rail grade crossing safety enhancements generally fall under 50.06.								
40.09	Relocation of existing households and businesses	In compliance with Uniform Relocation Act

		individual line items on Detailed Capital Cost Budget.									
00 FINAN	NCE CHARGES	Include finance charges expected to be paid by the project/program sponsor/grantee prior to eith									
		the completion of the project or the fulfillment of the FRA funding commitment, whichever occurs									
		later in time. Finance charges incurred after this date should not be included in Total Project Cost									
		later in time. Timanee charges incarred after this date should not be included in 10tal Project Cost									
		Derive finance charges from the project's financial plan, based on an analysis of the sources and w									
		Derive finance charges from the project's financial plan, based on an analysis of the sources and us of funds.									

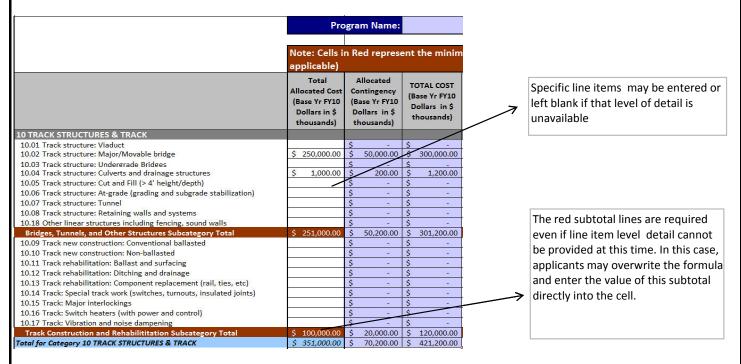

*NOTE: To help evaluate and compare the costs of different application FRA has developed 10 main Standardized Capital Cost Categories. These are provided to establish consistency in the use of the worksheets. The SCC cost breakdown is based on a traditional Design Bid Build model. If your project is Design Build, to the best of your ability, separate construction costs from design, administration, testing, etc. Put all construction costs in 10 through 60. Put design, administration, testing, etc. in "80 Professional Services." If you are not sure where to put a certain element of the project, consider the issue in general terms, using this sheet as a guide.

Detailed Capital Cost Budget Instructions

Instructions:

To assist FRA in comparing applications, this form provides a breakdown of capital costs using Standard Cost Categories (SCCs). Definitions of FRA's SCCs can be found in the "Capital Cost Info" tab of this workbook. The data you enter in this form should be drawn from budget estimates or analysis you have available for your program.

- 1. For purposes of Track 2, and to provide the additional detail commensurate with these relatively complex programs, subcategories have been created. Values must be entered in the red cells in the Detailed Capital Cost Budget tab for each subcategory total; values for each line item in white are optional. If you enter line item financial estimates the subcategory line will auto-sum. If you do not have line item estimates available, please enter the subcategory estimate directly.
- 2. Data is required at minimum for the red cells (enter zero if your program does not inlude a particular item). If a subcategory contains only one line item, you may enter the value in the line item or in the sub-category subtotal. Please only provide data for those cost categories associated with this program; leave others blank. (See example below) If you are providing line item details, (a) make sure to provide <u>all</u> the applicable line items for a given subcategory and (b) do not overwrite the formula in the red cell showing the subcategory total.

- 3. Explain any large discrete, identifiable and/or unique capital investments in the space provided at the end of this form. Where an explanation is required, the cells have been identified in red. Please include the reference to the Cost Category number (or subcategory name) in your explanation. Example: "10.07: Tunnel at xxxx [location], x.x miles in length, consists of one twin-tube New Austrian Tunneling Method tunnel with cross-passages located every .25 miles."
- 4. For purposes of this application "Base Year Dollars" are Fiscal Year (FY) 2010 Dollars.

Annual Capital Cost Budget

Instructions:

This form should provide a breakdown by year of the capital costs entered in the previous "Detailed Capital Cost Budget". The data you enter in this form should be drawn from any budget estimates or analysis you have completed for your program. (Thousands of dollars)

- 1. In the yellow cells, enter the annual dollar figures for each cost category in Base Year/FY 10 Dollars. Also provide the actual cost of 2009 activities in the Year of Expenditure (YOE) table. The blue cells above will auto-populate with the Base Year/FY 10 Dollars for FY 2009 if you entered assumed inflation rates in the "General Info" tab. If you did not enter assumed inflation rates, or you wish to make your own calculations, you may enter values in the light blue cells. Note: This form should reflect Federal Government Fiscal Years (FY) from October 1 through September 30.
- 2. The light blue Year of Expenditure (YOE) information will auto-populate if you entered assumed inflation rates in the "General Info" tab. If you did not enter assumed inflation rates, or you wish to make your own calculations, you may enter values in the light blue cells and provide further explanation in the box including descriptions of any attached supporting documentation.
- 3. Category 100, "Finance Charges," should be manually entered only for each year in for the YOE section of the table. This is necessary because of the added complexities embedded in these charges. The embedded formula will calculate the Base Year FY 2010 equivalent of YOE finance charges. Entries should accord with the financial plan for the project, as described in Sections 2.2 and 4.3.3.2 of the Guidance.

^{*} For the purpose of this application, base year dollars are considered FY 2010 dollars.

If not using the FRA-provided formulas, please describe your methodology in the space provided below as well as listing any supporting documentation.

^{**}Year-of-Expenditure(YOE) dollars are inflated Base Year dollars. Applicants may determine their own inflation rate and enter it on the "General Info" tab. Applicants should also explain their proposed inflation assumptions (and methodology, if applicable) in the Application Form.

[‡] As a convenience to applicants in cross-checking their figures, this column shows the "Total Costs" by category in FY 2010 dollars carried over from the "Detailed Capital Cost Budget" sheet.

Instructions for Operating and Financial Sheets

Applicants for Track 2 are required to project their corridor service's operating and financial performance at least through the tenth full year of operation (a longer period is required for the capital asset renewal charge -- see below).

The sheet "Operating & Maintenance Info." lays out an approach to passenger rail cost accounting and projection that accords with that employed by Amtrak in its recently-implemented "APT" system. The O&M cost categories in the "Operating and Financial Perf." sheet draw on the cost categories in the "Operating & Maintenance Info." sheet. If you have employed other approaches to O&M cost estimation, show the totals in the red-shaded cells for Year 1, Year 5, and Year 10 and provide supporting documentation describing your O&M cost projection methods. Otherwise, if your O&M projections support the O&M line items detailed in the form, enter your data and the total O&M expense will auto-calculate.

With respect to the "Capital Asset Renewal Charge" (CARC): please note that this is not a charge for the use of assets initially provided or renewed under the HSIPR program. Instead, it is an annualized allowance for future asset replacement, refurbishment, and expansion. Categories that would describe investments that together make up the CARC are shown in the lower section of the Operating and Financial Performance form. If your method of projecting future capital asset renewals and costs does not support the categories shown in the form, enter your totals in the red-shaded cells labeled "Total capital asset renewal charge (annualized amounts)." If your methodology supports the line items on the form, please fill in the individual category entries and the total will auto-populate. In either case, you will need to explain your methodology and procedures in supporting documentation.

An illustrative methodology for estimating the CARC follows. It can be applied to the total CARC, or to its constituent line items.

- Develop a schedule for the nature and expected cost (in FY 2010 dollars) of capital asset renewals, expansions, and additions for years 1 through 30 of the program's operation. Assign projected costs to the years in which they are expected to occur.
- Calculate the present value of the future expenditures thus assigned, based on the OMB-approved discount rate of 7 percent.
- Annualize the present value by calculating the equal annual payments over 30 years that would equate to the present value at the approved discount rate.

The annualized number will be the CARC, and should be entered on the appropriate row(s) of the Operating and Financial Performance Spreadsheet.

Operating and Maintenance Information (Standard O&M Cost Categories for Reference)							
Category/Subcategory	Definition						
0 Maintenance of Way (MoW)	Maintenance work on track assets along the right-of-way, including the roadbed, rails, cross-ties, ballast, and grade						
101 MoW Track	crossings.

303 Yard	trains between the yard and station, train makeup and breakup, moving equipment to and from mechanical facilities						
	and managerial costs rel						
304 Fuel	Diesel fuel costs for trains used in passenger service. Includes fuel costs only.						
305 Power - Electric Traction	Electric power costs for trains used in passenger service. Includes power costs only.						
306 Train Movement	Activities associated with moving passengers from endpoint to endpoint, including train dispatching, signal or interlocking operations, and the operations of any control or operations center(s).						
	interiocang operations, and the operations of any control of operations center(s).						
307 Train Movement-Railroad Services	Costs for services provided by other railroads, including infrastructure access, leasing of equipment, purchased fuel,						
	equipment maintenance or repairs, dispatching and signal services, and station costs.						
2007							
308 Transportation Support	Support and management of front-line train operations activities, including the costs of general and assistant superintendants, railroad foremen and assistant foremen, and other transportation operations-related activities.						
) Sales and Marketing	superintendants) rainoda forementana assistant foremen, and other transportation operations related activities						
401 Sales	Field sales and sales administration, travel agent services, and commercial account services, including expenditures for						
	travel agency commissions, credit card commissions, and airline system access fees.						
402 Information & Reservations	Reservation services to both the general public other distribution channels, such as travel agencies, including the cost call centers and information systems required to support reservation services.						
	Marketing and sales support activities, including market research, customer relations, advertising, production of						
403 Marketing	timetables, and sales promotions.						
Stations							
501 Stations	Station service activities, including ticketing, cleaning and maintenance, lounge operation, red cap and porter service						

	Operating and Maintenance Information (Standard O&M Cost Categories for Reference)							
	Category/Subcategory Definition							
60	00 Police, Security & Environmental Safety							
	601 Police and Security	Traditional police patrolling activities and surveillance, intelligence, and counterterrorism efforts in support of train service, facilities, and right-of-way.						
	602 Environmental & Safety	Activities to ensure and oversee environmental, health, and safety of employees and customers, including environmental and safety compliance.						
70	00 General and Administrative							
	701 Corporate Administration	Managerial and administrative activities that are enterprise-wide in scope and support all operations of the project or enterprise.						
	702 Centralized Services	Services that are enterprise-wide in scope, including IT, payroll operations, human resources, accounting, procurement, and so on.						
	otal Operating and Maintenance Costs for Purposes of HSIPR Program Application	Note: Does not include charges for return on, or return of, capital.						

Operating Information and Financial Performance

Instructions:

- 1. Input the operating and financial information in the yellow cells. (Dollar values are in millions of 2010 constant dollars except as noted.)
- 2. Ensure the light blue cells have auto populated with data based on the imbedded equations
- 3. Do not input information in cells with hatch marks.
- 4. If there is no "Comparable Existing Service," leave the FY 2008 and FY 2009 columns blank.
- 5. For lines 28 and 39 of the "Comparable Existing Service," enter YOE dollars into the yellow cells and the light blue cells will auto populate with FY 2010 dollars using the inflation assumptions detailed earlier in this workbook. If figures are already available in FY 2010 dollars, enter these over the formula in the light blue cell.

(9)	-	-	-	-				
(10)	-	-	-	-				
Total all sources		100%	100%	100%				

*Explanation of "Status of Funding": Committed sources are programmed funds that have all the necessary approvals (e.g. legislative or by referendum) to be used to fund the proposed operation without any additional action. These funds have been formally programmed and budgeted. Examples include dedicated or approved tax revenues, or cash reserves that have been dedicated to the proposed operation.

Budgeted: This category is for funds that have been budgeted and/or programmed for use in the proposed operation but remain uncommitted, i.e., the funds have not yet received statutory approval. An example would be a budget that has been submitted to the Legislature but not approved.

Planned: This category is for funds that are identified and have a reasonable chance of being committed, but are neither committed nor budgeted. Examples include proposed sources that require a scheduled referendum, requests for State/local operating or capital grants, and proposed debt financing that has not yet been adopted in the agency's CIP.

The above examples are illustrative. Applicants are free to provide other substantiated approaches to meeting the funding requirements to offset projections of both operating deficits and capital asset renewal charges.

Schedule- Track 2 Template Instructions: **Document Information** 1. Ensure the "Document Information" auto-populated in the upper right hand corner Project/Program Name (enter below): 2. Provide the anticipated "Start Date" and "End Date" for each high level activity in the white cells below 3. Where applicable, color the cells to the right of each activity to indicate the duration and timing of each activity between 2009 and 2012 (on a IA-Chicago to Iowa City-New Service Date of Submission 10/2/2009 4. Space has been provided to report activities that have ocured in the past. Only include dates for activities that are applicable to your program. Tip: Highlight the cells you wish to color and right click to select Format Cells. Use the Fill command to apply color.
